-March 2017-

1. The executive officer of the Board of Electrical Engineering is
A. PRC Commissioner C. Civil Service Commission
B. Chairman of the Board of EE D. IIEE President

2. The differential of the shear stress equation is which ones of the following
A. load on the beam C. bending moment of the beam
B. tensile strength of the beam D. slope of the elastic curve

3. The conductor used to connect the grounding electrode to the equipment grounding conductor, to grounded conductor, or to both, of the circuit at the equipment or at the source of a separated derived system.
A. Grounded Conductor C. Equipment Grounding Conductor
B. Grounding Conductor D. Grounding Electrode Conductor

4. Motors must be labelled with the following: nameplate rating, manufacturer's name and etc.
A. manufacturing rule B. construction rule
C. wiring design rule D. installation

5. Which of the following is not a part of the requirements to take RME?
A. Take 1-year electrician's course and 3-years apprenticeship
B. Take 2-year electrician's course and 2-years apprenticeship
C. Take 3-years of BSEE with apprenticeship
D. Graduate BSEE

6. What is the primary purpose of PEC?
A. to serve as guide for the untrained personnel
B. is to conserve electrical energy
C. is the practical safeguarding of persons and properly
D. to serve as manual guide for design

7. The process of outsmarting the search engine.
A. Google Fooling C. Search Engine Optimization
B. Rank Enhancement D. Search Engine Hacking

8. The Board of Electrical Engineering is composed of one chairman and how many members?
A. 2 B. 3 C.4 D. 5

9. Process of posting latitude and longitude to pictures and images.
A. Prodcasting B.Geotagging C.Flagging D. Posting

10. You are standing on a bathroom scale in an elevator. In which of these situations must then be the same as when the elevator is at rest?
A. Moving up at constant speed
B. Moving up with increasing speed
C. Moving down with increasing speed
D. In free fall (after elevator cable)

11. Which one is the portion of an instruction cycle where the instruction is sent from memory to register?
A. LOAD B. ACCUMULATE C. EXECUTE D. FETCH

12. For REE board examination, the passing general average is 70 percent provided there is no _____in any of the 3 subjects.
A. 50 percent B. 60 percent C. 65 percent D. 40percent

Created by Notein

13. What is the weight percent of mathematics subjects?
A. 40 B. 30 C. 45 D. 25

14. What is work-in-process classified as?
A. an asset B. a liability C. an expense D. owner's equity

15. What is the formula for a straight-line-depreciation rate?
A. **100 percent − percent net salvage value/estimated service life**
B. 100 percent net salvage value/estimated service life
C. percent net salvage value/estimated service life
D. average net salvage value/estimated service life

16. HTTP.// is an identifier that appears at the beginning of most Web page. What does HTTP stands for?
A. Hypertext Time Protocol C. Hypertext Transmission Process
B. Hypertime Text Protocol D. Hypertext Transfer Protocol

17. For a fluid, viscosity is defined as the constant of proportionality between shear stress and what other variable?
A. the spatial derivative of velocity
B. the time derivative of pressure
C. the time derivative of density
D. the spatial derivative of density

18. The thermodynamic statement of the conservation of energy of the system is the
A. first law B. second law C. third law D. zeroth law

19. In sizing of wire, this is:
A. manufacturing rule B. construction rule
C. wiring design rule D. installation rule

20. Galvanized steel are products coated with _.
A. Carbon B. Sulfur C. Zinc D. Nickel

21. Which is the study of heat and transformation of energy?
A. Thermodynamics B. Thermophysics
C. Thermoplastic D. Thermochemistry

22. A property of a material which it can be rolled a wire?
A. Ductility B. Malleability
C. Lustre D. Elasticity

Created by Notein

23. What is a measure of the average speed with which accounts receivable are collected?
A. Current Ratio B. Quick Ratio
C. Acid test ratio D. Receivable turnover

24. What do you call the ratio of income to owner's equity?
A. return of investment B. gross margin
C. rate of return D. interest expense

25. What is the old Electrical Engineering Law?
A. RA 814 B. RA 184 C. RA 9136 D. RA 7920

26. What is another term for "acid-test ratio"?
A. Current Ratio B. Quick Ratio
C. Profit Margin Ratio D. Price-earning model

27. A line ground system, the white conductor that carries current in normal operation is?
A. neutral B. ground
C. grounding conductor D. grounding elec

28. A 4-wire system has a high-leg voltage that is indicated by a wire of color _.
A. black B. orange C. brown D. red

29. What are considered as the "building blocks" for engineering materials?
A. Atoms B. Elements
C. Matters D. Compounds

30. Which of the following is not a structural class of steels?
A. tool and die
B. high strength, low strength carbon
C. carbon
D. stainless

31. Defects seen by optical or electron microscope
A. alteration B. aberration
C. atomization D. deformation

32. Which is not a programming language in web development?
A. XMLB. Elements B. FORTRAN
C. HTML D. Javascript

33. Which is not used in programming application?
A. C B. Java C. Oracle D. Visual Basic

34. What size in AWG should the wire be for 70 A overcurrent protection device?
A. 8 B.6 C. 4 D. 3

35. In the wiring of PEC 2009, what is the version of National Electrical Code that was patterned to?
A. 2008 B.2005 C. 2001 D. 2002

Created by Notein

36. After installing a new modem and router to a computer, what is the order of tuning on?
A. Computer, Modem, Router C. Modem, Computer, Router
B. Router, Modem, Computer D. Modem, Router, Computer

37. Which of the following is the process that cannot found in a carnot engine cycle?
A. Isobaric Expansion B. Adiabatic Compression
C. Adiabatic Expansion D. Isothermal Expansion

38. The largest solid conductor for raceway is
A. 8 mm2 B. 5.5 mm2 C. 14mm2 D. 3.5 mm2

39. To consider as continuous load
A. 3 hours and more B. 4 hours and more
C. 5 hours or more D. 6 hours or more

40. How many branch circuits in 55 kVA load, with 220 v and 20 A branch circuit?
A. 12 B. 13 C. 14 D. 15

41. NGCP warns ____alert if tropical disturbance within 24 hours.
A. yellow B. blue C. red D. weather disturbance

42. In computing, what is a tape drive?
A. a data storing device B. an OCR device
C. a pointing device D. a multimedia device

43. The continuous current must not exceed __of the rating of the conductor?
A. 60 percent B. 70 percent
C. 80 percent D. 90 percent

44. _____is an act of sending e-mails or creating web pages that are designed to collect an individual's online bank, credit card or other login information
A. Malware B. Hacking C. Cracking D. Phishing

45. The original amount of money invested, borrowed, or deposit
A. Interest B. Principal C. Funds D. Stock

46. A diagram drawn to help visualize and simplify problem having diverse receipts and disbursements.
A. Budget B. investment
B. year-end-convention D. Cash-flow

47. What refers to chemically combined elements with definite proportions of the component elements?
A. Mixture B. Molecules
C. Compound D. Alloy

48. Which of the following cannot be a property of a gas?
A. Density B. Pressure
C. Viscosity D. Temperature

Created by Notein

49. The relationship between the extension of a spring and the force required to produce the extension

A. F= ma
B. F =μN
C. F= mv^2/V
D. F = kx

50. The place where buyers and sellers are together.

A. Density
B. Pressure
C. Viscosity
D. Temperature

51. The linear portion of the stress-strain diagram of steel is known as the

A. modulus of elongation
B. Plastic range
C. Irreversible range
D. elastic range

52. For which of the following is the Program-Evaluation and Review Technique (PERT) not used?

A. construction projects
B. computer programming assignments
C. preparation of bids and proposals
D. queueing problems

53. In any collision, which of the following is conserved

A. kinetic energy
B. velocity
C. momentum
D. potential energy

54. What is another term for modulus of elasticity?

A. Bulk modulus
B. Shear strain
C. Constant of elongation
D. Young's Modulus

55. Which of the following is added to the drinking water distribution system for a disfunction?

A. Soda ash B. Chlorine C. Lime D. Iodine

56. An enclosed channel designed expressly for holding wires, cables, or busbars with additional functional permitted by the Philippine Electrical Code.

57. Sec. 23 of Art. III of RA 7920: Issuance of Certificates of Registration. The professional is required to renew license every ___ years upon payment of registration fees.

A. 1 B. 2 C. 3 D. 4

58. Service conductors made up in the form of a cable

A. Service cable
B. Service Raceways
C. Service Drop
D. Service Lateral

59. For hospitals, a general lighting load of ___VA/m2 shall be used.

A. 12 B. 24 C. 8 D. 16

60. A method of identifying the location of a given data record by its name.

A. Tracking
B. Linker
C. Signature
D. Hashing

Created by Notein

61. Sec. 14(a) (iii) of Article III. Examination and Registration, states that prior to commencing of work, the foreign professional shall secure special permit from the _____.

A. Commission
B. IIEE
C. PDEA
D. Bureau of Immigration

62. The Professional Regulation Commission (PRC) was created under

A. PD 223
B. PD 29
C. EO 223
D. EO 59

63. The ratio of Cp and Cv is called

A. isothermal index
B. Adiabatic index
C. Hypebeast index
D. None of these

64. Which of the following is the opposite of elasticity?

A. rigidity
B. malleability
C. ductility
D. plasticity

65. What is the area under the curve on a temperature-entropy diagram?

A. Heat B. Work C. Entropy D. Volume

66. Oxygen is converted into ozone by

A. great heat
B. high pressure
C. electric discharge
D. all of these

67. What rules are included in Article IV of RA 7920?

A. Rule 1 to 10
B. Rule 11 to 20
C. Rule 21 to 27
D. Rule 28 to 34

-August 2017-

1. The thermodynamics statement of the conservation of energy of a system is the

A. first law B. second law C. third law D. zeroth law

2. For REE board examination, the passing general average is __provided there is no grade below _____in any of the subjects.

A. 75 percent, 50 percent
C. 70 percent, 50 percent
B. 75 percent, 60 percent
D. 70 percent, 60 percent

3. Sec. 23 of Art III of RA 7920 Issuance of Certificate of Registration. The professional is required to renew license every __years upon payment of registration fees.

A. 1 B. 2 C. 3 D. 4

4. What is the shortcut key to reach the end of the document?

A. End B. Ctrl+End C. Shift+End D. Home

Created by Notein

5. According to RA 7920 the members of the BEE shall hold office for a term of ____ years from the date of appointment or until their successors shall have been appointed or qualified.
A. 6 B. 4 C. 3 D. 5

6. What refers to a system in which there is flow of mass across its boundaries?
A. Open System
C. Isolated system
B. Closed system
D. Steady flow system

7. BIOS stands for
A. Basic Input Output Society C. Base Input Output Society
B. Basic Input Output System D. Base Input Output System

8. What device is used to measure fluid velocity as well the velocity of fluid inside a pipe?
A. Barometer B. Hydrometer C. Pilot tube D. Pilot tube

9. Bernouli's equation is an expression of
A. conversation of mass C. conservation of momentum
B. conversation of energy D. conservation of mass and energy

10. Motors must be labelled with the following nameplate rating, manufacturer's name and etc. This is:
A. manufacturing rule C. wiring design rule
B. construction rule D. Installation rule

11. Partially protected locations under canopies, marquees, roofed open porches, and like locations, and interior locations subject to moderate degrees of moisture.
A. Wet location B. Dry location C. Damp location D. Moist location

12. What is the minimum age for a person to become a member of the Board of Electrical Engineering?
A. 30 B. 35 C. 40 D. 45

13. When an object exerts a force on another object, the second object exerts on the first a force of the same magnitude but in the opposite direction. This law is known as:
A. Newton's First law of Motion C. Equipment Grounding Conductor
B. Newton's Second law of Motion D. Grounding Electrode Conductor

14. A system or circuit conductor that is intentionally grounded.
A. Grounded Conductor C. Equipment Grounding Conductor
B. Grounding Conductor D. Grounding Electrode Conductor

15. Fastest internet connection for home users nowadays.
A. DSL B. Dial-up C. FTTH D. Broadband wireless

16. Which of these elements has the highest atomic numbers?
A. Titanium B. Uranium C. Radium D. Plutonium

Created by Notein

17. Concurrent forces are those forces whose line of action
A. meet at one point
B. lie on the same line
C. meet on the same plane
D. none of these

18. A couple produces
A. combined translator and rotational motion
B. rotational motion
C. translator motion
D. none of these

19. The rate of doing work is known as
A. power B. potential energy C. kinetic energy D. none of these

20. The condition of equilibrium or motion of a rigid body remains unchanged if a force acting at a given point of the rigid body is replaced by a force of same magnitude and direction, but acting at a different point provided that the two force have same line of action. This statement is known as _____.
A. Pappus Propositions
B. Principle of Transmissibility
C. Parallelogram Law
D. Varignon's Theorem

21. The property of a material which allows it to be drawn into a smaller section is called
A. Plasticity B. Ductility C. Elasticity D. Malleability

22. When a body is subjected to three mutually perpendicular stresses, of equal intensity, the ratio of direct stress to the corresponding volumetric strain is known as
A. Young's modulus
B. Modulus of Rigidity
C. Bulk Modulus
D. Poisson's ratio

23. A diagram which show the variations of the axial for all sections of the span of a beam, is called
A. Bending moment diagram
B. Shear force diagram
C. Thrust diagram
D. Stress diagram

24. The ratio of the lateral strain to the linear strains is
A. modulus of elasticity
B. modulus of rigidity
C. bulk modulus
D. Poisson's ratio

25. What is an annuity?
A. the future worth of a present amount
B. an annual repayment of a clan
C. a series of uniform amounts over a period of time
D. the present, worth of a future amount

26. Which of the following closely related to d'Alembert's theorem?
A. Newton's first law of motion
B. Newton's second law of motion
C. Newton's third law of motion
D. Bernouli's theorem

27. It state that if two bodies are in thermal equilibrium with a third body, they are also in thermal equilibrium with each other.
A. first law of thermodynamics
B. zeroth law of thermodynamics
C. third law of thermodynamics
D. second law of thermodynamics

Created by Notein

28. The opposite of alkali.
A. Acid B. Base C. Fluid D. Substance

29. The viscosity of fluid varies with
A. temperature C. density
B. pressure D. temperature and pressure

30. The New Electrical Engineering Law 7320 originated from House Bill No. _ & Senate Bill No. ___.
A. 11063 & 1766 B. 11063 & 1870
C. 11070 & 1871 D. 11070 & 1875

31. The Implementing Rules and Regulations (IRR) of RA 7920 was approved under Board Resolution No. ___series of 1995.
A. 16 B. 18 C. 22 D. 24

32. The first metal used by man was
A. Iron B. Copper C. Gold D. Bronze

33. Article II of Code of Ethics for Electrical Engineers contains:
A. SEC. 1 to 8 B. SEC. 1 to 6 C. SEC. 1 to 9 D. SEC. 1 to 7

34. Article IV, Rule ___Requirements for examination as a REE.
A. 14 B. 15 C. 16 D. 17

35. A type of annuity where the payments are made at the start of each period, beginning from the first period
A. Ordinary annuity C. Deferred annuity
B. Annuity due D. Perpetuity

36. In electrochemistry oxidation is a loss of ___.
A. electron B. proton C. Ion D. anode

37. The cycle generally used for gas turbines is
A. Rankine cycle B. Carnote cycle
C. Otto cycle D. Brayton cycle

38. What is PDC stands for in EPIRA?
A. Philippine Distribution Commission C. Philippine Distribution Committee
B. Philippine Distribution Code D. Philippine Distribution Coordination

39. The color of zinc is:
A. greyish white B. greenish white C. bluish white D. yellowish white

40. Which of the following computer language is used for artificial intelligence?
A. FORTAN B. PROLOG C. C D. COBOL

41. Property of a fluid by which its own molecules are attracted is called
A. Adhesion B. Cohesion
C. Viscosity D. Compressibility

Created by Notein

42. Structural steal elements subjected to torsion develop
A. tensile stress
B. compressive stress
C. shearing stress
D. bending stress

43. In flow process, neglecting KE and PE changes - ∫VdP represents which item
A. heat transfer
B. shaft work
C. closed system work
D. flow energy

44. Which of the following is spreadsheet software?
A. Microsoft Word
C. Microsoft Excel
B. Notepad
D. Power Point

45. Before starting any installation work, alteration, repair or extension any electrical system, what type of permit is needed?
A. Building permit
C. Electrical permit
B. Working permit
D. Mayor's permit

46. A computer _____is self-replicating computer program.
A. Viruses B. Worms C. Spyware D. Malware

47. A glass of ice water is filled to the brim with water, the ice cubes stick up above the water surface. After the ice melts, which is true?
A. The water level is below the top of the glass.
B. The water level is at the top of the glass but no water has spilled.
C. some water has spilled over the side of the glass.
D. Impossible to say without knowing the initial densities of the water and ice.

48. Battery acid is the common name for
A. formic acid B. hydrochloric acid C. nitric acid D. sulphuric acid

49. For school buildings, the general lighting load is _VA per square meters.
A. 24 B. 28 C. 16 D. 8

50. Sec. 34 of Art. IV: Sundry Provision Relative to Practice of Electrical Engineering states that _____.
A. Personnel required
B. Preparations of plans, supervision of installation, application of PEC code
C. Practice not allowed for firms and corporations
D. Prohibitions in the Practice of Electrical Engineering

51. RA 7920 Rule 2(d) defining?
A.CHED B. Commission C. Board of EE D. TESDA

52. Which wave requires a medium for transmission?
A. light B. Infrared C. radio D. sound

53. The iron that has been cooled quickly from a molten state is known as
A. Blue cast iron B. Pink Cast Iron C. Brown Cast Iron D. White cast iron

54. What does the prefix Tera refers to?
A. 10^12 B. 10^15 C. 10^-12 D. 10^-15

Created by Notein

55. What is PSALM in EPIRA strand for?
a.Private sector Assets and Liabilities Management
b. Private section Assets and Liabilities Management
c. Power sector Assets and Liabilities Management
d.Power section Assets and Liabilities Management

56. Article V of Code of ethics stated that:
This code shall take effect upon approval by the ___and after (15) days following it's publication in the Official Gazette.
A. Commission B. PRC C. IIEE. D. CHED

57. What is the temperature rating of THHN insulation?
A. 60degC B. 90 deg C C. 85 deg C D. 75 deg C

-March 2016-

1. Which of the following is Charle's law?
A. V = k x 1/P B. P1/T1 = P2/T2 C. PV = mRT D. V/T = k

2. Which of the following is the ideal gas law?
A. V/T = k B. P1/T1 = P2/T2 C. PV = mRT D. V = k x 1/P

3. FTTH means ___.
A. Flexible To The House C. Fiber To The House
B. Flexible To The Home D. Fiber To The House

4. A device used in Thermal power plant to reduce air pollution?
A. Pulverizer B. Precipitator C. Disulfurizer D. Chimney

5. What are elements that have properties intermediate between metals and nonmetals?
A. Gases B. Solids C. Metalloids D. Liquids

6. What is the primary purpose of PEC?
A. to serve as guide for the untrained personnel
B. is to conserve electrical energy
C. is the practical safeguarding of persons and property
D. to serve as manual guide for design

7. Vinegar is solution of H2O and what acid?
A. sulfuric acid B. acetic acid C. phosphoric acid D. nitric acid

8. What is the other term for storing data in a memory?
A. reading B. loading C. memorizing D. writing

9. What is the common input device?
A. speaker B. keyboard C. mouse D. LCD

Created by Notein

10. The mole is a basic unit of measurement in chemistry. Which of the following is not equal so or the same as one mole of the substance indicated?
A. 22.4 liters of nitrogen gas as STP
B. 6.02x1023 oxygen molecules
C. 1 g of hydrogen atoms
D. 16 g of oxygen molecules

11. The process of outsmarting the search engine.
A. Google Fooling C. Search Engine Optimization
B. Rank Enhancement D. Search Engine Hacking

12. A particle is moving with its acceleration parallel to velocity. What is the direction of the particles?
A. circle B. linear C. parabolic D. never

13. What do you call the kind of wire used to bind the service drop to the service point?
A. Joint wire B. Splice wire C. Tie wire D. None of these

14. What device used to measure fluid velocity as well the velocity of fluid inside a pipe?
A. Barometer B. Pivot Tube
C. Hydrometer D. Thermometer

15. The board of Electrical Engineering is composed of one chairman and how many members?
A. 2 B. 3 C. 4 D. 5

16. The term "Thermodynamics" comes from the Greek words "Therme" and "Dynamis" which means?
A. heat, power B. heat, motion
C. heat, transfer D. heat, energy

17. An object moving in a circle at a constant speed has an acceleration that is
A. in the direction of motion C. away from the center of the circle
B. toward the center of the circle D. zero

18. Which of the following is the basic equation of accounting?
A. Assets = Liability + owner's equity
B. Liability = Assets + owner's equity
C. Owner's equity = Assets + liability
D. Owner's equit = Liability + Assets

19. You are standing on a bathroom scale in an elevator, in which of these situation must the same as when the elevator is at rest?
A. Moving up at constant speed
B. Moving up with increasing speed
C. Moving down with increasing speed
D. in free fall (after the elevator cable has snapped)

Created by Notein

20. What is another term for “acid-test ratio”?
A. Quick Ratio C. Current Ratio
B. Price-earnings Ratio D. Profit margin ratio

21. What is the force per unit area?
A. work B. energy C. pressure D. power

22. What principle behind in a hydraulic brake of the automobile?
A. Archimedes Principle C. Stoke’s Principle
B. Bernoulli’s Principle D. Pascal’s Principle

23. The measure of randomness or disorder is known as the
A. entropy B. enthalpy C. energy D. power

24. Applicants for registered master electrical’s examination must be at least _ years of age.
A. 18 B. 19 C. 20 D. 21

25. Which of the following is not a part of the requirements to take free examination?
A. he is citizen of the Philippines
B. He is at least twenty-one (21) years of age
C. He is good reputation with low morale values
D. He has not been finally convicted by the court of an offense involving moral turpitude

26. If you leave the refrigerator door open and the refrigerator runs continuously, the kitchen will
A. get cooler C. get warmer
B. remain as the same temperature D. get warmer or colder

27. Process of posting latitude and longitude to picture and images.
A. Podcasting B. Geotagging C. Flagging D. Posting

28. The process of detecting. Locating and correcting logic errors in a program
A. compiling B. reading
C. detecting D. debugging

29. In any collision, which of the following is conserved.
A. kinetic energy B. velocity C. momentum D. potential

30. A manometer is used to measure?
A. positive pressure C. atmospheric pressure
B. negative pressure D. positive as well as negative pressure

31. The maximum bending moment in a cantilever of span L carrying a U.D.L of intensity w per unit length is.
A. wL2 B. wL2/2 C. 2 wL2 D. wL2/8

32. The process of mixing clay, water and other ingredients to make brick is known as
A. kneading B. moulding C. pugging D. dying

Created by Notein

33. One Newton is equivalent to
A. 106 dyne B. 107 dyne C. 108 dyne D. 109 dyne

34. Otto cycle is also known as
A. Constant pressure cycle C. Constant temperature cycle
B. Constant volume cycle D. Constant entropy cycle

35. What is the most common alloying ingredient in copper?
A. Iron B. Zinc C. Lithium D. Magnesium

36. Which of the following conductors is not applicable on wet locations?
A. Type THHN B. Type THW C. Type RHW D. Type THWN

37. Which characteristic of a wave changes as the wave travels across a boundary between two different m
A. frequency B. period C. phase D. speed

38. For office building, a general lighting load of _____VA/m2 shall be used.
A. 12 B. 16 C. 24 D. 28

39. A market situation where there is only one seller with many buyers.
A. Monopoly B. Monopsony C. Oligopoly D. Oligopsoly

40. Study of motion with reference to the force which causes the motion is.
A. kinematics B. kinetics C. statics D. dynamics

41. In RA 7920, section 23 of article III: Issuance of Certificates of Registration. The professional is renew licence every _____years upon payment of registration fees.
A. 1 B. 2 C. 3 D. 6

42. It is the ratio of the ultimate stress to the allowable stress.
A. proportionally constant B. strain
C. bulk modulus D. factor of safety

43. What is the entropy of a pure substance at a temperature of absolute zero?
A. Unity B. Zero C. Infinity D. Undefined

44. Which of the following closely related to d'Alembert's theorem?
A. Newton's first law of motion C. Newton's third law of motion
B. Newton's second law of motion D. Bernoulli's theorem

45. What is the energy equivalent of a mass of 1 kilogram?
A. 4.5 x 1016 J
B. 9 x 1016 J
C. 4.5 x 1012 J
D. 9 x 1012 J

Created by Notein

46. The area of the shear diagram of a beam between any two points on the beam is equal to the
A. change in shear between the two points.
B. total shear beyond the two points.
C. change in moment between the two points.
D. change in deflection between the two points

47. Which element is the best conductor of electricity?
A. gold B. silver C. copper D. aluminum

48. Litmus paper changes from blue to red when a solution tested is
A. a blue dye B. an acid C. a red dye D. a base

49. RA 9136 has four sectors, which of the following is not included?
A. system operation B. supply
C. distribution D. generation

50. The radius of gyration of a circular section of diameter d is:
A. d/16 B. d/4 C. d D. d/2

51. Enthalpy of an ideal gas is a function only of
A. internal energy C. the product of pressure and specific volume
B. pressure D. temperature

52. It is the claim of anyone to ownership.
A. proprietorship B. liability C. equity D. assets

-August 2016-

1. Which location may be temporarily subjected to dampness or wetness?
A. Dry B. Damp C. Moist D. Wet

2. Which of the following is very reactive in its pure form?
A. Na B. He C. HCl D. CO2

3. Which of the following is an instruction that causes data to be brought from memory into an accumulator register?
A. LOAD B. LOOP C. FETCH D. JUMP

4. Installations underground or in concrete slabs or masonry in direct contact with earth.
A. Wet location B. Dry Location C. Damp Location D. Moist Location

5. MS-WORD is a type of?

A. System Software B. Operating System
C. Application Software D. System Software

6. What is CD-ROM?
A. Compact Disk Read Only Memory C. Compact Data Read Only Memory
B. Compatible Disk Read Only Memory D. Compatible Data Read Only Memory

Created by Notein

7. What is the weight percentage of electrical engineering professional subjects?
A. 40 B. 35 C. 45 D. 25

8. In an ideal gas, both pressure and temperature increases to thrice the original temperature respectively, if the original volume is Vo, then the new volume is,
A.2Vo B.Vo C.Vo/2 D.4Vo

9. First law of thermodynamics is also known as:
A. Conservation of Heat C. Conservation of Energy
B. Heat Transfer D. Utilization Energy

10. How do you measure the voltage of a circuit element?
A. Voltmeter in series with the element
B. Voltmeter in parallel with the element
C. Ammeter in parallel with the element
D. Ammeter in series with the element

11. What is the most common reinforcement for polymer composites?
A. Boron B. Ceramic C. Graphite D. Glass Fiber

12. A process in pressure is constant?
A. Isobaric B, Isochoric C. Isometric D. Isothermal

13. Section 40 of article IV of RA 7920 is the Penalty Clause, states that any person who shall violate any of the provisions of this Act shall be guilty of misdemeanor and shall, upon conviction, be sentenced to a fine of not less than __nor more than P50, 000 or imprisonment for a period not less than 6 months nor more than 5 years or both at the discretion of the court.
A.P 10,000 B.P 15,000 C.P 25,000 D.P 30,000

14. According to RA 7920 the members of the BEE shall hold office for a term of _____year from the date of appointment or until their successors shall have been appointed and qualified.
A.6 B.4 C.3 D.5

15. Which doesn't have electric charge?
A. Proton B. Electron C. Molecule D. Neutron

16. May is declared as the electrical safety month virtue of _signed by Pres. Benigno Aquino III last June 27, 2011 for the reason of informing the public of the real reason of faulty electrical wiring.
A. RA 7920 C. Proclamation No. 183
B. Proclamation No. 193 D. RA 184

17. What is the maximum efficiency engine operated from a high temperature reservoir to a low temperature reservoir?
A. Carnot B. Otto C. Ericson D. Bell-Coleman

Created by Notein

18. EPIRA is RA 9136 which means_.
A. Electric Power Installation Reform Act
B. Energy Power Isolation Reform Act
C. Electric Power Industry Reform Act
D. Energy Power Institution Reliability Act

19. EPIRA is RA _____.
A.184 B. 9136 C.9163 D.7920

20. Conservation of _____is used in collision, Explosion and the like.
A. mass B. energy C. momentum D. heat

21. The deflection beam is
A. directly proportional to the modulus of elasticity and moment of inertia.
B. inversely proportional to the modulus of elasticity and the length of the beam cubed
C. inversely proportional to the modulus of elasticity and moment of inertia
D. directly proportional to the load imposed and inversely proportional to the length squared

22. What is the system program used to translate directly an assembly language to machine language called
A. Compiler B. Debugger C. Interpreter D. Assembler

23. What best defines annuity?
A. a series of equal payments occurring at equal periods of time
B. First payment does not begin until some later date.
C. value of the stock as stated on the stock certificate.
D. difference between the present value and the worth of money at some time in the future.

24. The change that the system undergoes from one equilibrium state to another is known as ___.
A. path B. process C. enthalpy change D. Entropy change

25. What is the entropy of pure substance at the temperature of absolute zero?
A. unity B. zero C. infinity D. undefined

26. What is the amount of heat needed to turn 1kg of substance at its melting point from the solid to the liquid state?
A. Heat of fusion C. Heat of condensation
B. Heat of vaporization D. Heat of fission

27. For rectangular section of breadth “b” and depth “h” the section modulus is given by:
A. z = bh3/12 B. z = bh3/6 C. z = bh2/12 D. $z = bh^2/6$

28. Ideal fluid has:
A. no surface tension
B. no surface tension, no viscosity
C. no surface tension, no viscosity and no compressibility
D. surface tension, viscosity and compressibility

Created by Notein

29. The area of the shear diagram of a beam between any two points on the beam is equal to the
A. Change in shear between the two points
B. Total shear beyond the two points
C. Average moment between two points
D. Change in moment between two points

30. Carbon dioxide "snow" from a fire extinguisher puts out a fire because it
A. lowers the kindling temperature of the material
B. displaces the supply of oxygen
C. raises the kindling temperature of the material
D. cools the material below its kindling temperature

31. The rocks generally used for roofing, is
A. granite B. basalt C. slate D. trap

32. During a refrigeration cycle, heat is rejected in a:
A. evaporator B. condenser
C. compressor D. expansion valve

33. Stainless steel resists corrosion due to
A. carbon B. sulfur C. chromium D. vanadium

34. Absolute reference in a spreadsheet is used by inserting a ___sign before the column and row. This is used for data reference in another cell.
A. period B. dollar C. semi-column D. hyphen

35. Earth's surface is part of the
A. asthenosphere B. Lithosphere
C. benthosphere D. troposphere

36. This refers to energy-consuming equipment including motors, heaters, furnaces, light sources and other devices which utilize electric energy, for any purpose.
A. Industrial Plant C. Processing Plant
B. Utilization Equipment D. Transformer

37. A pilot tube is used to measure:
A. discharge B. velocity of fluid
C. total energy of the fluid D. all of these

38. Which group of the periodic table is known as the alkali metals?
A. Group 1 B. Group 2 C. Group 3 D. Group 4

39. Which law states "Entropy of all perfect crystalline solids is zero at absolute zero temperature"?
A. Zeroth Law of thermodynamics C. Second Law of thermodynamics
B. First Law of thermodynamics D. Third Law of thermodynamics

40. In galvanized iron, a lining on iron is provided with:
A. Sn B. Zn C. Cu D. Al

Created by Notein

41. (U + PV) is a quantity called
A. Flow energy B. shaft work C. entropy D. enthalpy
42. The element that is practically insoluble in solid is known as
A. Lead B. Brass C. Boron D. Neon

43. What do you call materials that do not conduct electric current?
A. Conductor B. Insulator C. Semi-conductor D. Intrinsic Material

44. A branch of physical science which deals with the state of rest or motion of bodies under the action of forces.
A. Mechanics B. Kinetics C. Kinematics D. Statics

45. A wire or cable carrying electric current, supported by poles, tower of other structures, but not including vertical or lateral connecting wires.
A. Transmission Line C. Conductor
B. Line Conductor D. Lateral Conductor

46. What refers to the value of an asset which is disinterested third party, different from the buyer and seller, will determine in order to establish a price acceptable to both parties?
A. Book value B. Market value C. Fair value D. Franchise value

47. A general term covering on assembly or assemblies of devices for switching, interrupting, controlling, metering of electric power.
A. Enclosure B. Switchgear
C. Switchboard D. Panel board

48. In air conditioning of aircrafts, using air as refrigerant, the cycle used is:
A. Reversed Joule Cycle C. Reverse Brayton Cycle
B. Reversed Carnot Cycle D. Reverse Otto Cycle

49. The second period contains how many elements
A. 2 B. 4 C. 6 D. 8

50. Mercury cannot wet a glass tube. That is due to:
A. Cohesion B. adhesion C. surface tension D. viscosity

51. How many atoms are there per unit cell of a BCC structure?
A. 1 B. 2 C. 3 D. 4

-March 2015-

1. Partially protected locations under canopies, marquees, roofed open porches, and like locations, and interior locations subject to moderate degrees of moisture, such as some basements some barns, and some cold-storage warehouses.
A. Dry B. Damp C. Moist D. Wet

2. A location not normally subjected to dampness or wetness. A location classified as ____ maybe temporarily subjected to dampness or wetness as in the case of building under construction.

Created by Notein

A. Dry B. Damp C. Moist D. Wet

3. Combination of laminar and turbulent flow.
A. Critical B. continuous C. laminar D. turbulent

4. A system or circuit conductor that is intentionally grounded.
A. Grounding conductor C. Grounding Electrode Conductor
B. Grounded Conductor D. Grounding Equipment

5. Most common pressure measuring device use today
A. Bourdon tube gauge C. Kelvin gauge
B. Manometer D. Barometer

6. Poisson's Ratio is the ratio of the
A. Unit lateral deformation to the unit longitudinal deformation
B. Unit stress to unit strain
C. Elastic limit to proportional limit
D. Shear strain to compressive strain

7. Which is not covered by Thermodynamics
A. Utilization of energy C. Transfer of energy
B. Transformation of energy D. Storage of energy

8. What is the SI unit of mass?
A. Newton B. kilogram C. slug D. pound

9. What is the SI unit of length?
A. Meter B. centimeter C. feet D. inches

10. The differential of the shear equation is which one of the following?
A. Load on the beam C. bending moment of the beam
B. Tensile strength of beam D. slope of the elastic curve

11. Under very slow deformation and at high temperature, it is possible to have some plastic flow in a crystal at a shear stress lower than the critical shear stress. What is the phenomenon called?
A. Slip B. twinning C. creep D. bending

12. Which of the following elements and compounds is unstable in its pure form?
A. Sodium (Na) C. Carbon dioxide (CO2)
B. Helium (He) D. Neon (Ne)

Created by Notein

13. BIOS stands for

A. Basic Input Output Society C. Base Input Output Society

B. Basic Input Output System D. Base Input Output System

14. The minimum diameter of a steel ground electrode is

A. 10mm B. 12mm C. 14mm D. 16mm

15. The branch of mechanists which deals wt. bodies in motion is known as _.

A. Statistics B. Dynamics C. Kinetics D. Kinematics

16. Bernoulli's equation is based on

A. The second law of motion C. the conservation of momentum

B. The third law of motion D. the conservation of energy

17. Pluto travels from perihelion to aphelion. What is the work done by gravity on Pluto?

A. Zero B. negative C. positive D. undetermined

18. Carnot cycle is maximum efficiency in _____engine.

A. Steam B. gas C. reversible D. well lubricated

19. It is the interest earned by the principal which is added to the principal will also earn an interest for the succeeding periods.

A. Compound interest B. simple interest

C. Discount D. interest rate

20. What refers to the case hardening process by which the carbon content of the steel near the surface of the part is increased?

A. Carburizing B. Annealing C. Normalizing D. Martempering

21. If two balls are thrown with the same initial velocity, with one ball is thrown 20 degrees above horizontal and the other is thrown horizontally. Neglecting air resistance, which ball will hit the ground with the greatest speed?

A. the ones thrown horizontally

B. the ones thrown 20 degrees' angle

C. both balls will land in the same velocity

D. lack of data

22. MS-DOS is a type of?

A. System software B. operating system

C. application software D. system architecture

23. MS-WORD is a type of

A. System software C. application software

B. Operating system D. system architecture

Created by Notein

24. What is CD-ROM?

A. Compact Disk Read Only Memory B. Compatible Disk Read Only Memory

C. Compact Data Read Only Memory D. Compatible Data Read Only Memory

25. The second law of thermodynamics can be stated as:

I- Heat flows spontaneously from a hot object to a cold one, but not the reverse;

II- Natural processes tend to move toward a state of greater disorder or greater entropy.

A. I only B. II only C. I and II D. Neither I nor II

26. Who is not a member of the board EE?

A. Francis V. Mapile C. Gregorio T. Cayetano

B. Fortunato C. Leynes D. Jaime V. Mendoza

27. For REE board examination, the passing general average is 70% provided there is no grade below ___in
Any of the 3 subjects.

A. 50 % B. 60% C. 65% D. 40%

28. What is the weight percentage of electrical engineering professional subjects?

A. 40 B. 35 C. 45 D. 25

29. In an ideal gas, both pressure and temperature increases to twice the original pressure and temperature respectively. If the original volume is Vo, then the new volume is

A. 2Vo B. Vo C. Vo/2 D. 4Vo

30. The ampacity of the fuse should be 125% of the continues load current is covered by

A. Installation design C. manufacturing design

B. Wiring design D. construction design

31. Generators and motors should be dust proof is covered by class III,

A. Installation design C. wiring design

B. manufacturing design D. constructional design

32. In thermodynamics we focus our attention on which form of energy?

A. Kinetic B. potential C. internal D. total

33. What is the coal that has been previously burned in an oxygen-poor environment?

A. Tuyere B. Coke C. Diamond D. Hematite

34. What is the most common reinforcement for polymer composites?

A. Boron B. Ceramic C. Graphite D Glass fiber

35. What is the principle behind fiber optics?

A. Reflection B. Refraction C. Diffraction D. Dispersion

Created by Notein

36. A conductor used to connect equipment r the grounded circuit of a wiring system to a grounding electrode or electrodes.

A. Grounding Conductor
C. Grounding Electrode Conductor
B. Grounded Conductor
D. Grounding Equipment

37. When magma rocks cool, these rocks are called

A. Granite
B. sedimentary rocks
C. igneous rocks
D. metamorphic rocks

38. The conductor that used to connect the grounding electrode to the equipment grounding conductor to the grounded conductor, or to both, of the circuit at the service equipment or at the source of separately derived system.

A. Grounding Conductor
C. Grounding Electrode Conductor
B. Grounded Conductor
D. Grounding Equipment

39. A device intended for the protection of personnel that functions to de-energize a circuit or portion thereof within an established period of time when a current to ground exceeds some predetermined value that is less than that required to operate the overcurrent protective device of the supply circuit.

A. Grounding Conductor
B. Grounding-Fault Circuit Interrupter
C. Grounding Conductor Equipment
D. Ground-Fault Protection of Equipment

40. The maximum bending moment of a beam simply supported at both end and subject to total load W uniformly distributed over its length L is expressed by the formula.

A. WL/8
B. WL^2/8
C. WL/2
D. WL/4

41. What is the form of the moment diagram of a beam supported at both ends and carrying a uniformly distributed load?

A. Triangle
B. hyperbola
C. parabola
D. rectangle

42. A byte is composed of how many bits?

A. 2
B. 4
C. 6
D. 8

43. A gas in the atmosphere that traps sun's UV rays.

A. Oxygen
B. helium
C. ozone
D. water vapour

44. Adiabatic process is?

A. No heat transfer
B. reversible
C. irreversible
D. constant pressure

45. The equipment grounding conductor of branch circuit shall be identified by what color?

A. Green
B. Black
C. White
D. Gray

Created by Notein

46. In bathtub and shower areas no part of cord-connected fixtures, hanging fixtures, lighting track, pendants, or ceiling-suspended (paddle) fans should be located with a zone measured _____horizontally and vertically from the top of the bathtub rim or shower shall threshold.

A. 1000 mm, 3000 mm
C. 900 mm, 2400 mm
B. B. 600 mm, 3000 mm
D. 800 mm, 2500 mm

47. What is the maximum operating temperature of the type UF conductor?

A. 75 deg C B. 90 deg C C. 60 deg C D. 110 deg C

48. Structural steel elements subjected to torsion develop

A. Tensile stress
B. compressive stress
C. shearing stress
D. bending stress

49. The chief source of energy in the world today is

A. Coal B. oil C. natural gas D. uranium

50. Which element is present in all organic compounds?

A. Oxygen B. carbon C. nitrogen D. phosphorus

51. A substance that, when added to a solution, makes changing the pH of the solution more difficult.

A. Catalyst B. solute C. solvent D. butter

52. At the highest or lowest point of the moment diagram

A. Maximum shear occurs
C. maximum moment is twice the shear
B. Shear is zero
D. shear is negative

53. The chemical shorthand name for molybdenum is

A. Mo B. Mb C. Md D. Mn

54. Formula for magnesium Nitrite

A. Mg2(NO2)2 B. MgNO2 C. Mg(NO2)2 D. Mg2(NO2)3

55. A force causing a rise fluid of liquid in tubes of small diameter.

A. Cohesion B. surface tension C. capillarity D. adhesion

56. In RA 9136, what is SGC stands for

A. Successor Generating Company
C. Special Generating Company
B. Successor Generation Company
D. Special Generation Company

57. In RA 9236, what is CREM stands for

A. Competitive Retail Electricity Market
B. Competitor Retail Electricity Market
C. Competitive Retail Energy Market
D. Competitor Retail Energy Market

Created by Notein

58. Article II of Code of Ethics for Electrical Engineers contains:
A. SEC. 1 to 8 B. SEC. 1 to 7 C. SEC. 1 to 6 D. SEC. 1 to 9

59. Article IV, Rule ___. Requirements for examination as a REE
A. 14 B. 15 C. 16 D. 17

60. What rules are included in Article V of RA 7920?
A. RULE 1 to 10 B. RULE 11 to 20
C. RULE 21 to 27 D. RULE 28 to 34

61. The phenomenon of melting under pressure and freezing again when the pressure is reduced is known as
A. Sublimation B. condensation C. deposition D.regelation

62. Which of the following cycle is used in vapor cycle power plant?
A. Brayton cycle B. Rankine Cycle
C. Diesel cycle D. Ericson cycle

-August 2015-

1. Commercially used pressure measuring device is
a.Bourdon tube gauge C. Kelvin gauge
B. Manometer D. Barometer

2. In thermodynamics we focus our attention on which forms of energy?
A. kinetic B. potential C. internal D. total

3. The purpose of copper steel alloying is to increase
a.atmospheric corrosion resistance C. corrosion resistance
B.hardness and strength D. deoxidation

4. The abbreviation for binary digit
A. bid B. bin C. bit D. byte

5. Installations underground or in concrete slabs or masonry in direct contact with the earth.
A. Wet location C. Damp location
B. Dry location D. Moist location

6. What impurity in steel can cause "red shortness" which means the steel becomes unworkable at high temperature?
C. Sulfur C. Manganese
D. Silicon D. Phosphorus

7. A system or circuit conductor that is intentionally grounded.
E. Grounding Conductor C. Grounding Electrode Conductor
F. Grounded Conductor D. Grounding Equipment

Created by Notein

8. A conducting connections, whether intentional or accidental, between an electric circuit or equipment and the earth, or to some conducting body that serves in place of the earth.
A. Grounded B. Ground C. Short D. Fault

9. Aluminum can be added to steel to produce
A. killed steel B. dead steel C. live steel D. first steel

10. Which of the following is an alkaline earth metal?
A. Ba B. Ti C. Li D. Na

11. The second law of thermodynamics can be stated as:
I. Heat flows spontaneously from a hot object to a cold one, but not the reverse;
II. Natural processes tend to move toward a state of greater disorder or greater entropy
A. I only B II only C. I and II D. Neither I nor II

12. Structural steel elements subjected torsion develop
G. tensile stress C. shearing stress
H. compressive stress D. bending stress

13. Formula of kinetic energy:
A. v2/2m B. $mv^2/2$ C. 2mv2 D. mgh

14. The three moment equation may be used to analyze
I. a continuous beam C. a step tapered column
J. a beam loaded at the third points D. a three element composite beam

15. An essential part of a large dam and provides an efficient and safe means of releasing flow of water that exceeds the design capacity of the reservoir.
A. spillway B. weir C. culverts D. standpipe

16. An open system first law should be utilized for all of the following except:
K. nozzle
L. turbine
M. a piston-cylinder device with no inlet/exhaust valves
N. a compressor

17. The property that characterizes a material's ability to be drawn into wire is its
O. tensile strength C. ductility
P. thermal conductivity D. fatigue endurance limit

18. What do you call a system in which there is a flow of matter through the boundary? This system usually encloses the device that involves mass flow, such as compressor, turbine, or nozzle.
A. Closed system
B. Open system
C. Isolated system
D. All of these

Created by Notein

19. What system in which there is no exchange of matter with the surrounding or mass does not cross its boundaries?
E. Open system
F. Closed system
G. Isolated system
H. Non flow system

20. Which of the following is not a function of computer?
A. understanding B. processing C. controlling D. inputting

21. Change in enthalpy occurs at constant ____.
A. pressure B. volume C. temperature D. entropy

22. The first law of thermodynamics is based on which of the following principles?
A. Conservation of mass C. Action and reaction
B. Conservation of energy D. The entropy-temperature relationship

23. Impulse type turbine named after his creator.
A. Pelton B. Kaplan C. Francis D. Propeller

24. In flow chart, what is the symbol used in decision making?
A. oval B. rectangle C. diamond D. square

25. Which of the following is not a fundamental rule in PEC?
A. Construction Rule C. Installation Rule
B. Wiring Rule D. Manufacturing Rule

26. Reversed Joule cycle is also known as
A.Ranking Cycle
B.Sterling Cycle
C. Brayton Cycle
D. Bell-Coleman Cycle

27. Also known as PRC Renewal Law
A. R.A. 8189 B. R.A. 8981 C. R.A. 7920 D. R.A. 7918

28. ASCII means
A. American Standard Code for Information Output
B. American Standard Code for Input Information
C. American Standard Capacity for Information Input
D. American Standard Code for Information Interchange

29. WWW stands for
A.World Wide War C. World Wide Wrestling
B.World Wide Web D. World Wide Workers

30. ALU stands for
A.Arithmetic Logic Unit C. Arithmetic Logic User
B.Arithmetic Logical Unit D. Arithmetic Logical User

31. The simple mathematical statement of the relationship between elastic stress and strain: stress is proportional to strain. What is this law?

Created by Notein

A. Boyle's Law B. Hooke's law C. Charle's Law D. Gas Law

32. An empty glass was initially place with a cube ice. A water was filled into a glass such that the ice at the tip of the glass. What will happen after the ice melts?
A. cannot be determine since no density of ice and water are given
B. some spilled
C. some spilled on the side of the glass
D. nothing spilled

33. Regnault's law relates to
A. Internal Energy B. Specific Heat C. Specific Volume D. Entropy

34. Dual Combustion cycle is used in:
A. Petrol Engine B. Diesel Engine C. Steam Engine D. Gas Turbine

35. In a Throttling process
A. There is no work done C. There is no change in enthalpy
B. There is no heat transfer D. All of these

36. If two objects have the same momentum, but different masses, which of these is possible?
A. the one with less mass has more kinetic energy
B. the one with more mass requires more impulse to bring it to that momentum from rest
C. the same work is done to each to accelerate it from rest
D. they have the same velocity

37. Which of the following is not a ductile metal?
A. Aluminum B. Copper C. Mild Steel D. Lead

38. As a person moves closer to a plane mirror, the size of the image formed by the mirror
A. remains the same C. gets smaller
B. gets larger D. increases, then decreases

39. The executive officer of the Board of Electrical Engineering is _.
a.PRC Commissioner C. Civil Service Commission
B.Chairman of the Board of EE D. IIEE President

40. If the speed of light in a vacuum is c, then the speed of light of light in a medium with an index of refraction of 2 will be
A. c/2 B. 2c C. c/4 D. 4c

41. The radius of gyration of a circular section of diameter d is:
A. d/2 B. d/4 C. d D. d/8

42. The ozone layer exists primarily in what section of the atmosphere?
a.Troposphere
b. Stratosphere
c. Mesosphere
d.Ionosphere

Created by Notein

43. The majority of the rocks in the Earth's crust are:
A. igneous B. metamorphic C. sedimentary D. basalt

44. What element is added to copper to make it extremely hard?
A. Silicon B. Aluminum C. Lead D. Zinc

45. The maximum bending movement in a simple supported beam of span L and carrying a central concentrated load "W" is
A. WL B. WL/2 C. WL/4 D. 2WL

46. An object orbits the star in an elliptical orbit. The distance at aphelion is 2a and the distance at perihelion is a. Determine the ratio of the object's speed at perihelion to that at aphelion.
A. 2 B. √2 C. 1 D. 4

47. The most abundant element in the universe is
A. He B. C C. H D. O

48. It is the payment for the use of borrowed money.
A. load B. interest C. maturity value D. principal

49. The Hooke's law holds good within
A. yield point B. elastic limit C. plastic limit D. Euler's limit

50. The Pauli Exclusion Principle states that
a. any atoms with a free s orbital can form bonds
b. no two atoms can occupy the same orbital unless their spins are different
c. two atoms can occupy the same orbital unless their spins are different
d. atoms of the same configuration do not change

51. The speed with which a liquid escapes from a vessel through an orifice is given by
A. Archimedes' Principle C. Bernoulli's Theorem
B. Torricelli's Theorem D. Flow equation

52. What is Article II of Code of Ethics for Electrical Engineers?
A. Relations with Client and Employer C. Professional Life
B. Relations with Fellow Engineers D. Penal Provisions

53. RA 7920, Rule 2(o) defining?
A. IIEE B. DECS C. CHED D. TESDA

54. Which of the following is the poorest conductor of electricity?
A. Carbon B. Silver C. Steel D. Aluminum

55. Who invented the barometer?
A. Torricelli B. Avogadro C. Rutherford D. Becquerel

Created by Notein

-March 2014-

1. This principle states that "Where the velocity of the fluid is high, the pressure is low, and where the velocity is low, the pressure is high".

A.Archimedes Principle C. Flow Principle
B.Toriceilli's Principle D. Bernouili's Principle

2. What is the chemical formula for Sulfur Trioxide

A. S3O2 B. S2O C. S2O3 D. SO3

3. What is CPE in RA 7920 stands for?

A. Continuous Professional Education
B. Continuing Professional Education
C. Continuous Professional Educator
D. Continuing Professional Educator

4. What is PSALM in EPIRA stands for.

A.Private Sector Assets and Liabilities Management
B.Private Section Assets and Liabilities Management
C.Power Sector Assets and Liabilities Management
D.Power Section Assets and Liabilities Management

5. It is the sum of the internal energy and PV

A. entropy B. enthalpy C. energy D.electric field

6. A boy and his sledge weighs m, on an inclined surface with angle of inclination of phi. And coefficient friction of u. What is the frictional force?

A. mgsinphi B. mgcosphi C. μmgsinphi D. μmgcosphi

7. Two sky divers jump at the same time and want to play catch. Where should one aim if he wants the other catch it?

A. below
B. above because ball falls faster
C. above because ball falls slower
D. straight because there's no air resistance

8. Which of the following is not part of this requirements to take RME?

A.Taken 1-year electrician course and 3-years apprenticeship
B. Taken 2-year electrician course and 2-years apprenticeship
C. Taken 3-year electrician course and 1-years apprenticeship
D. Graduate of BSEE

9. Which of the following is non-renewable energy?

A. nuclear B. wind C. solar D. geothermal

10. What is JCPC is EPIRA stands for?

A. Joint Congressional Power Committee
B. Joint Congress Power Committee
C. Joint Congressional Power Commission
D. Joint Congress Power Commission

Created by Notein

11. What is PEMC is EPIRA stands for?
A. Philippine Electricity Market Commission
B. Philippine Electricity Market Company
C. Philippine Electricity Market Committee
D. Philippine Electricity Market Corporation

12. What is TSC in EPIRA stands for?
A. Transition Supplier Contract B Transition Supply Contract
C. Transition Supplier Commission D. Transition Supply Commission

13. The rate of change of shear strain in fluid is:
A. Shear rate B. pressure rate C. stress rate D. strain rate

14. In thermodynamics our attention is focused on which form of energy.
A. Kinetic energy B. internal energy C. Potential energy D.Total energy

15. It is the process of determining the value or worth of a physical property for specific reason.
A. investment B. valuation C. economy D. depletion

16. An annuity where the payments are made at the beginning of each period.
A. ordinary annuity B. deferred annuity C. annuity due D. perpetuity

17. The machine that is employed for converting the energy of flow in a pipeline into mechanical work is called
A. turbine B. pump C. nozzle D. motor

18. The equivalent grounding conductor of a branch circuit shall be identified by what color?
A. red with green stripe B. white
C. black and yellow D. green and yellow

19. The most important element that controls the physical properties of steel is.
A. silicon B. tungsten C. manganese D. carbon

20. Spark plug makes use of which of the following materials for insulation?
A. porcelain B. asbestos C. slate D. glass

21. In electrochemistry, oxidation is a loss of _.
A. electron B. proton C. ion D. anode

22. Cash money and credit necessary to establish and operate on enterprises.
A. capital B. funds C. assets D. liabilities

23. What is the form of the moment diagram of a beam supported at both ends and carrying a uniform distributed load.
A. triangle B. hyperbola C. parabola D. rectangle

24. Every object continues in its state of rest, or of uniform velocity in a straight line, as long as no net force acts on it, this statement is in the accordance ti
a.newton first law of motion C. newton's third law of motion

Created by Notein

b. newton's second law of motion D. all of these

25. Any equipment which produces, modifies, regulates, or controls the supply of electric energy is the "_____"
A. Electric Supply Equipment C. Substation
B. Transformer D. Generator Set

26. LED displays represents
A. Loop Emitter Decoder C. Long Emission Disc
B. Light Emitting Diode D. Logic Electrostatic Diode

-August 2014-

1. Momentum is closely related to
A. kinetic energy B. potential energy C. impulse D. power

2. In thermodynamics we focus our attention in which form of energy?
A. kinetic B. potential C. internal D. total

3. The element that is practically insoluble in solid copper is known as
A. Lead B. Brass C. Boron D. Neon

4. The standard pressure in meters of ammonia (**ρ=600kgm3**) is:
A. 17 B. 19 C. 23 D. 31

5. A law which states that in a present fluid, the pressure exerted on it anywhere gets transmitted in all directions.
A. Archimedes' Law C. Darcy's Law
B. B. Stoke's Law D. Pascal's Law

6. Steels that are used for axles, gears and similar parts requiring medium to high hardness and high strength are known as
A. Low-carbon steels C. High-carbon steels
B. Medium-carbon steels D. Very high-carbon steels

7. A boy throws a ball with negligible air resistance. What happen to its acceleration?
A. Remains constant
B. Decelerate when the ball is going up and accelerated when going down
C. Increases
D. Decreases

8. Which is not a programming language?
A. FORTRAN B. LOTUS C. PASCAL D. COBOL

9. The units of joules can be converted to which of the following?
A. Pa-m^2 B. N-kg C. Pa/m^2 D. Pa-m^3

Created by Notein

10. When two bodies isolated from other environment, are in thermal equilibrium with a third body, the two are in thermal equilibrium with each other. What do you call does statement?
A. Zeroth Law of Thermodynamics
B. First Law of Thermodynamics
C. Second Law of Thermodynamics
D. Third Law of Thermodynamics

11. It is a mixture of two or more non-volatile liquids in which separation takes place very slowly.
A. suspension B. solution C. colloids D. emulsion

12. The purpose of copper in steel alloying is to increase
A. Atmospheric corrosion resistance
B. Hardness and strength
C. Corrosion resistance
D. Deoxidation

13. The unit lighting for a dwelling unit expressed in watts per square meter shall be
A. 8 watts B. 16 watts C. 24 watts D. 40 watts

14. A certain dam with height h and width w. Find force.
A. F=0.5 pgh B. F=pgh
C. F=pgw^2h D. F=pgwh^2

15. The study of mechanics of fluids which deals with velocities and streamlines without considering forces or energy
A. kinematics B. hydrostatics C. hydrodynamics D. hydrology

16. What is the S.I. unit of pressure?
A. Dyne-cm B. Pascal C. Bar D. kg/cm^2

17. What is the form of momentum diagram of beam supported of both ends without external load?
A. Triangle B. Linear C. Circular D. Parabola

18. What is the smallest unit of information handled by a computer?
A. Bit B. Byte C. Cell D. Character

19. A byte is composed of how many bits?
A. 2 B. 4 C. 6 D. 8

20. In thermodynamics our attention is focused on which form of energy?
A. Kinetic Energy B. Internal Energy

Created by Notein

C. Potential Energy D. Total Energy

21. A loan that is discharged or repaid by a uniform series of payments extending over its duration is said to be
a.funded B. depreciated
C. amortized D. bonded

22. Which of the following engines is the most efficient?
a.gasoline engine B. diesel engine
C. gas turbine D. carnot engine

23. A branch of hydraulics which deals with the study of pure motion in liquids.
a.hydrology B. hydrokinetics
C. hydrostatic D. hydrodynamics

24. When exposed to the atmosphere, which of the following liquids is coldest?
A. Oxygen B. nitrogen C. hydrogen D. helium

25. The abbreviation for a binary digit.
A. bid B. bin C. bit D. byte

26. For REE board examination, the passing general average is 70% provided there is no grade below _in of the 3 subjects.
A. 50% B. 60% C. 65% D. 40%

27. Newton's first law is of the referred to as which of the following?
a.The law of straight-line method
b. The law of momentum
c.The law of inertia
d.F = ma

28. A market condition where there are two buyers and two sellers is called___
a.Duopoly C. bilateral oligopoly
b. duopsony D. bilateral duopoly

29. The element that was discovered between calcium and titanium is
A. Silicon B. Scandium C. Molybdenum D. Potassium

30. Which gate is formed by inverting the output of the AND gate?
A. NAND gate B. OR gate C. NOR gate D. None of these

31. Any equipment which produces, modifies, regulates, or controls the supply of electric energy is the_____
a."Electric Supply Equipment C. "Substation"
b. "Transformer" D. "Generator Set"

32. RA 7920, Rule 2 (d) defining?
A. CHED B. Commission C. Board of EE D. TESDA

33. What is the article V of Code of Ethics for Electrical Engineers?

Created by Notein

a.Professional Life C. Effectivity
b. Penal Provisions D. Relations with Client and Employer

34. The best method used to refine gold metal is
a.Bassemerization C. Distillation
b. Oxidation D. Electrolysis

35. An object that has momentum must also have
A. Acceleration B. impulse C. kinetic energy D. potential energy

36. The Hooke's law hold good within
A. Yield point B. elastic limit C. plastic limit D. Euler's limit

37. A spring whose force constant is k is cut in half. Each of the new springs has a force constant of
A. k/2 B. k C. 2k D. 4k

38. Light scattered perpendicularly to an incident beam is partly
A. diffracted B. polarized C. monochromatic D. coherent

39. RA 9136 has four sectors, which of the following is not included?
A. supply C. generation
B. distribution D. system operation

40. Galvanized steel product s are coated with _.
A. Carbon B. Sulfur C. Zinc D. Nickel

41. What is PDC stands for EPIRA?
A. Philippine Distribution Commision C. Philippine Distribution Committee
B. Philippine Distribution Code D. Philippine Distribution Coordination

42. The thermodynamic statement of the conservation of energy of a system is the
A. first law B. second law C. third law D. zeroth law

43. A carwash area is classifies as
A. Wet location B. dry location C. damp location D. moist location

44. Motors must be labeled with the following nameplate rating, manufacturer's name and etc. This is
a.Manufacturing rule C. Wiring design rule
b. Construction rule D. installation rule

45. In sizing of wire, this is:
a.Manufacturing rule C. Wiring design rule
b. Construction rule D. installation rule

46. The first period contains how many electrons?
A. 2 B. 4 C. 6 D. 8

Created by Notein

47. Which of the following would be considered a system rather than a control volume?
A. A pump B. A tire C. A pressure cooker D. A turbine

48. The particle inside the nucleus is called
A. Nucleic B. Nuclons C. Nucleons D. nuclei

49. Cables for 220 kV lines are invariably?
C. Mica insulated C. Paper insulated
D. Compressed oil or compress gas D. Rubber insulated

50. What group of steels are high-carbon, high-chromium tools steels suitable for cold working applications?
A. Group A B. Group D C. Group H D. Group M

51. Which of the following phenomenon cannot take place with sound waves?
A. Interference B. Polarization C. Diffraction D. Reflection

52. The ore from which iron is obtained is
A. Sphalerite B. Bauxite C. Taconite D. Chalocite

53. The Electrical Engineer shall have observe such system of____principles and values as a set of dynamic standards to guide his conduct and way of life. It is his duty to practice profession according to ethics.
A. Dignity B. Moral C. Basic D. Engineering

54. What is the most undesirable of all elements commonly found in steels?
A. Phosphorus B. Manganese C. Silicon D. Sulfur

-March 2013-

55. A type of annuity where the payments are made at the start of each period, beginning from the first period.
A. Annuity due B. Ordinary Annuity
c. Perpetuity D. Deferred Annuity

56. The product of force and the time during which it acts is knows as:
A. Momentum B. impact C. impulse D. work

57. Formula of calcium chloride
A. CaCl2 B. Ca2Cl C. CaCl D. CaCl3

58. An elevator is pulled by cable at constant speed. The tension in the cable is equal to
A. The weight B. twice the weight
C. thrice the weight D. half the weight

59. Branch circuit larger than ___ampere shall supply only non-lighting outlet load.
A. 20 B. 50 C. 15 D. 3

Created by Notein

60. Prefix 105 is
A. Pico B. atto C. peta D. Fernto

61. Which of the following refer to the diffusion of a solvent into a stronger solution in an attempt to equalize the two concentrations?
A. Purification B. electrolysis
C. osmosis D. hydrolysis

62.A measure of how it emits radiant energy in comparison with a blackbody at the same temperature.
a.Absorptivity B. reflectivity
C. emissivity D. conductivity

63. A graphical device used to convert a truth table to its corresponding logic circuit in a simple, orderly process.
A. State Table B. State Diagram
C. Karnaugh Map D. Truth Table

64. Define WESM?
a. Wholesale Electrical Spot Market
b. Wholesale Electrical Supply Market
c. Wholesale Electricity Spot Market
d. Wholesale Electricity Supply Market

65. All the powers of the TRANSCO shall be vested in and exercised by a Board of Directors. Who will be the ex officio Chairman of the Board?
A. Sec. of the Dept. of Energy (DOE)
B. Sec. of the Dept. of Finance (DOF)
C. Secretary of DENR
D. President of TRANSCO

66. At least how many receptacle outlets shall be installed in the bathroom?
A. One B. Two C. Three D. Four

67. When an object exerts force on another object, the second object exerts on the first a force of the same magnitude but in opposite direction. This statement is in accordance to
a.Newton's First Law of Motions
b. Newton's First Second of Motions
c. Newton's Third Law of Motions
d.All of these

68. The Moody diagram is used in fluid mechanics to obtain
A. The drag coefficient C. the friction factor
B. The Stroudal number D. the pressure coefficient

69. The coils of D. C. motor starter are wound with wire of
A. Copper B. manganin C. kanthal D. Nicrome

70. The chemical shorthand for molybednum is
A. Mo B. Mb C. Md D. Mn

71. Which two metals combine to give galvanized metal?

Created by Notein

A. Lead and tin B. zinc and iron
C. tin and iron D. zinc and tin

72. The pressure of a gas is directly proportional to the Kelvin temperature in
A. Boyle's law B. Gay-Lussac's law
C. Boyd's law D. Charles' Law

-August 2013-

1. What is the chemical formula of ammonia?
A. NH4 B.NH3 C.N2H3 D.N3H2

2. Maximum distance for support of rigid metallic conduits.
A. 2000mm B. 2500mm C.3000mm D.3500mm

3. The minimum diameter of a steel ground electrode is?
A. 10mm B. 12mm C. 14mm D. 16mm

4. What is a substance that speeds up chemical reaction without itself undergoing a chemical change?
A. Ingredients B. Reactants C. Solvent D. Catalyst

5. What is a substance that speeds up chemical reaction without itself undergoing a chemical change?
A. Ingredients B. Reactants C. Solvent D. Catalyst

6. A software that is commonly known as firmware.
A. OS B. Cache memory C.BIOS D.IO

7. What is the minimum lighting load required by PEC for an office measuring 20m by 25m?
A.6000 VA B.7000 VA C.12000 VA D.14000 VA

8. What is the risk is operating a restaurant?
A. safe B. neutral C. ambivalent D. risky

9. What is the factor name for the formula (1+i)-n?
A. Uniform gradient future worth C.Single payment present worth
B. Capital recovery D.Single payment compound amount

10. At what point is the applied force minimal in opening a hinge door?
A. near the hinge C.at the center
B. farthest the hinge D.anywhere

11. At what point is the applied force minimal in opening a hinge door?
A. near the hinge C.at the center
B. farthest the hinge D.anywhere

12. Common cause of failure of termination of cable.
A. Splicing C. penciling of insulation
B. Clearances D. none of these

Created by Notein

13. What is the acid concentration of Nitric acid, HN03 with pH value of -0.55?
A.2.33 M B.4.55 M C.5.33 M D.3.55 M

14. A thin-walled spherical shell contains a liquid, if it undergoes a thermal coefficient of linear expansion a and subjected to a temperature change of ΔT, what is the ratio of change in volume ΔV to the original volume V?
A. ΔT.3a B.3a ΔT C.3 ΔT/a D.3a ΔT/2

15. The amount of lateral strain in a tension member can be calculated using.
A. the bulk modulus B. poison's ratio C. the yield stress D. Hooke's law

16. It is the price a buyer is willing to pay a willing seller for the stock.
A. Bond value B. Scrap value C. Market value D. Stock value

17. A single grounding electrode is permitted when the resistance to ground does not exceed.
A.5 ohms B.10ohms C.15ohms D.25ohms

18. the most important element that controls the physical properties of steel is
A. Silicon B. Tungsten C. Manganese D. Carbon

19. Gross profit, sales less cost of goods sold, as a percentage of sales is called:
A.ROI ratio B. Profit margin C. gross margin D. Price earnings

20. is regarded as father of computers.
A, Pascal B. John Napler C. Chanas Babbage D. Abacus

21. In electrochemistry, oxidation is a loss of _.
A. ion B. electron C. proton D. anode

22. If a disturbance is parallel to the direction of travel of a wave, the wave is classified as
A. longitudinal B. electromagnetic C. transverse D. torsional

23. The viscosity of fluid varies with
a.temperature C. density
b. pressure D. temperature and pressure

24. Which of the following is NOT a vector quantity?
A. displacement C. speed
B. acceleration D. momentum

25. A device used to keep moisture from passing through the system is called:
A. trap B. aerator C. humidifier D. dehydrator

26. A device used to keep moisture from passing through the system is called:
A. trap B. aerator C. humidifier D. dehydrator

Created by Notein

27. A written acknowledgement by a carrier that he has received the goods for shipment
A. Crate bill B. Bill of Loading
C. ticket D. Contract to Ship

28. Battery acid is the is the common name for
A. formic acid B. hydrochloric acid C. nitric acid D. sulfuric acid

29. Which of the following engines is normally the least efficient?
A. gasoline engine C. gas turbine
B. diesel engine D.Carnot engine

30. Electrical symbol represented by a broken line
A. Open wiring B. Circuit homerun
C. Underground wiring D. Emergency wiring

31. Which of the following is not a unit of power?
A. joule-second C. newton-meter per second
B. watt D. horsepower

32. RA 7920, Rule 2 (d) defining?
A. CHED B. Commission
C. Board of EE D. TESDA

-August 2012-

1. The external pressure applied to a confined fluid increases the pressure of every point in the fluid by an amount equal to the external pressure. This is known as
A. Pascal's principle C. Torricelli's Theorem
B. Archimedes principle D. Bernoulli's Theorem

2. Maximum distances between busway supports.
A. 1000 mm B. 1500 mm C. 1800 mm D. 2000 mm

3. What charge has the elements belong to the group 2?
A. 2 B. 1 C. -2 D. -1

4. What does UPS mean?
a.Uninterrupting Portable Supply
b. Uninterruptable Power Supply
c. Uninterrupting Power Supply
d.Uninterruptable Portable Supply

5. Which device could be used to determine whether a substance is radioactive?
a.a Van de Graaf generator C. a cyclotron
b. a Geiger counter D. a linear accelerator

6. Which is not a standard overcurrent protection device rating?
A. 50 B. 1500 C. 225 D. 110

7. It is responsible for the procurement and administration of funds with the view of achieving the objectives of business.

Created by Notein

A. Capital B. Budget C. Finance D. Funds

8. A device used to measure atmospheric pressure is called
C. Manometer C. Pycnometer
D. Barometer D. Hydrometer

9. What is RES stands for in EPIRA?
a. Retail Energy Supply C. Retail Electricity Supply
b. Retail Energy Suppliers D. Retail Electricity Suppliers

10. Which is not a unit of power?
a. joules/second C. watts
b. newton-seconds D. calories/second

11. Which wave requires a medium for transmission?
A. light B. infrared C. radio D. sound

12. A substance formed by the union of two or more chemical elements in a definite proportion that can be only be separated by chemical means
a. mixture C. ion
b. molecules D. compound

13. The viscosity of a fluid varies with
A. temperature C. density
B. pressure D. temperature and pressure

14. What is the strong bond between hydrogen atoms known as?
A. the iconic bond C. ionic and metallic bonds
B. the metallic bond D. the covalent bond

15. The path of a projectile is:
A. a parabola C. a part of a circle
B. an ellipse D. a hyperbola

16. During an isentropic process, which of the following is true?
a. The temperature increases as the pressure decreases.
b. The temperature increases as the volume increases.
c. The heal transfer equals the enthalpy change.
d. The heat transfer is zero

17. Which one of the following elements has the largest atomic radius?
A. lithium C. beryllium
B. sodium D. magnesium

18. Varignon's theorem is used to determine the _____.
a. moment of inertia C. location of centroid
b. mass moment of inertia D. moment of area

19. RA 7920, Rule 2 (d) defining?
A. CHED B. Commission C. Board of EE D. TESDA

Created by Notein

20. Galvanized iron is a term referring to iron coated with:
A. aluminum B. magnesium C. tin D. zinc

21. Article III of Code of Ethics for Electrical Engineers contains:
a.SEC. 1 to 8 C. SEC. 1 to 6
b. SEC. 1 to 7 D. SEC. 1 to 5

22. Which metal is protected by a layer of its own oxide?
A. aluminum B. silver C. gold D. iron

23. A force causing a rise of a liquid in tubes of small diameter.
A. cohesion B. surface tension C. capillarity D. adhesion

24. Accounting book in which are recorded the credits and debits of commercial transactions.
A. ledger C. balance
B. journal D. clerk's book

25. RA 7920 contains how many sections all in all
A. 40 B. 41 C. 43 D. 45

26. The most important element that controls the physical properties of steel is
A. Silicon B. Tungsten C. Manganese D. Carbon

27. Which is the scalar quantity?
A. force B. energy C. displacement D. velocity

28. A fluid property which refers to the intermolecular attraction by which the separate particles of the fluid are held together:
A. cohesion B. adhesion C. capillarity D. tension

29. When the velocity of an object is tripled, another quantity which is tripled at the same time is the objects:
A. momentum B. potential energy C. kinetic energy D. mass

30. A substance existing the gaseous phase but relatively near its saturation temperature is known as:
A. Gas B. Water C. Steam ` D. Vapor

31. How many atoms are there per unit cell for a face-centered cubic structure?
A. 1 B. 2 C. 3 D. 4

32. Funds supplied and used by owners of an enterprise in the expectation that a profit will be earned
A. equity capital C. save
B. credit D. Investment

33. The critical angle is the angle of incidence that produces an angle of refraction of
A. 0 deg B. 45 deg C. 60 deg D. 90 deg

34. If an object is moving north, the direction of the frictional force is
A. north B. south C. east D. west

Created by Notein

35. What is the distance between two consecutive points in phase on a wave called?

A. frequency
C. amplitude
B. period
D. wavelength

A location not normally subjects to dampness or wetness. A location classified as _____may be temporarily subject to dampness or wetness, as in the case of a building under construction

36. The overall energy program formulated and updated yearly by the DOE and submitted to Congress pursuant to RA. 7638

a. Philippine Energy Plan (PEP)
b. Power Development Program (PDP)
c. Preliminary Project Planning Data (PPPD)
d. Philippine Electrical Code (PEC)

-God bless-
